Foreword

Successful education policies are shaped and strengthened by accurate, timely and reliable data, to improve localized governance practices, enhance accountability and ultimately improve the teaching and learning process in schools. Considering the importance of robust data collection, the Elementary & Secondary Education (E&SE) Department, Government of Khyber Pakhtunkhwa prepares and publishes the Annual Statistical Report of Government Schools on an annual basis.

The Annual Statistical Report 2017-18 is the outcome of Annual Schools Census (ASC) conducted between November and December 2017, through a rigorous exercise of data collection with a reference date of 31st October 2017. This publication is the 27th Annual Statistical Report of Government Schools in the province.

The Independent Monitoring System (IMU) was established in 2014, as a project of E&SED, to address obstacles in school-level data collection and to bring greater accountability to KP's education sector. Independent Monitoring Unit's Data Collection and Monitoring Assistants (DCMAs) collected the data for this report. Managers in the Education sector could now benefit from regular, reliable and robust data on issues such as teacher and student attendance, among other key indicators. Independent Monitoring Unit has been monitoring schools since its inception in 2014, and in just a few years, IMU established its record credibility.

The DCMAs collected and physically verified various school-based indicators after due consultations with head teachers of each school. This information was uploaded to the database by DCMAs using smartphones. A single questionnaire was designed keeping in view the needs of various units of E&SED and fed into a web-based android application. This application had inbuilt consistency checks and filtering techniques to ensure the reliability and accuracy of data. The data was further analyzed by IMU's IT support team and EMIS section of E&SED using various statistical tools as the second layer of data validation. It ensured the high quality of data for policymaking in the education sector.

The report comprises of educational data pertaining to all level of Government Schools ranging from primary, middle, higher to higher secondary level. The report includes four Parts. Part-I furnishes an executive summary, Part-II summarized provincial statistics ranging from the number of schools, enrollment, teachers, and analysis. Part-III covers district-wise statistics, and Part-IV consists of the questionnaire used during the census.

The Independent Monitoring Unit is thankful to its DCMA's who brave difficult field conditions, volatile security situations and cover treacherous terrains in Khyber Pakhtunkhwa to ensure all schools are monitored. IMU encourages all stakeholders to review this report and provide useful feedback to further improve this report in future.
