PREFACE

Preface

Life is completely crippled by pandemic covid-19 in all respects. World is affected badly by this pandemic where governments all over the world had to lock down almost all the institutions country wide. Pakistan had to face the same situation in almost all institutions in general and educational institutions in particular due to their closure for almost seven months. Our country is still facing the worst situation due to the second wave of covid-19 and there is complete uncertainty about future course.

Keeping in view this worst situation the Government of Khyber Pakhtunkhwa Elementary and secondary education Department has taken an initiative of introducing an accelerated academic calendar for educational institutions to cater the needs of the students in the prevailing scenario. The Directorate of Curriculum and Teacher Education (DCTE) being competent authority has the task of reducing the Higher Secondary School Certificate (HSSC) syllabus. Consequently, this Directorate arranged a workshop. Subject Experts from the various educational institution both from collages and School were invited for the preparation of this accelerated syllabus. This accelerated syllabus is prepared in light of the expected available time for students in the prevailing situation. It was also kept in mind that the basic concepts and ideas of all subjects must not be affected. It is hoped that this accelerated academic calendar will be helpful to students in all respects in fulfilling their study requirements.

I am thankful to all the Subject Experts of various institutions who participated in this activity by offering their expertise on short notice, I acknowledge and appreciate their efforts in this regard. I also appreciate the efforts DCTE personnel in completion of this urgently needed national task on emergency grounds.

ACCELERATED ACADEMIC CALENDAR FOR HIGHER SECONDARY CLASSES

Education systems in most countries have been adversely affected by COVID-19, and has prompted widespread country-wide school//college closures and physical distancing measures, likewise in Pakistan, and specifically in Khyber Pakhtunkhwa Province.

Talking specifically of Khyber Pakhtunkhwa, for an enhanced education system-level response to the pandemic, The Elementary & Secondary Education Department, Government of Khyber Pakhtunkhwa undertook substantial steps to ensure continuity of learning in an equitably. An important step taken by the E&SED is the Development of Accelerated Academic Calendar for the Higher Secondary classes.

The Boards of Intermediate and Secondary Education in Khyber Pakhtunkhwa and other stakeholders highlighted the need for the development of Accelerated Academic Calendar (ACC) at the Higher Secondary level classes i.e. 11th and 12th. These classes have also suffered in terms of time lost, the same way as the lower grades. The students are at the decisive entry point in pursuit of their academic career as they have to appear for the Board Examination. For this academic session, the teaching learning time available is less than the normal routine.

Since this is a critical and complex level, with a complicated vertical and horizontal alignments and closely knit progression of the course contents in each subject, it cannot be left to the teachers to pick and choose the topics to be dropped or taught to the students. There is a need for carefully and technically reviewing the course contents, and the Academic Calendar, by the Subject Experts, and decide the selection of content to be taught to students in the shortened time period, without disturbing its alignment.

As this is high stake intervention, which will enable the teachers to make effective and efficient use of the time available and cover all the essential course contents, and help students to be able to show good performance in summative assessment and examination. It will be mandatory for BISEs set the papers on the topics/contents mentioned in the AAC for the session 2020-2021.
